X-Ite a composition of open texture resembling travertine—or close texture of a soft two-tone effect, in standard colors—slate, buff, olive, natural, brown, etc.

X-Ite consists of Magnesite as a main ingredient combined with numerous chemicals—can be sawed and nailed like wood—approximately $\frac{1}{2}$ the weight of stone—can be cleaned either with soap and water or gasoline and polished with floor wax—is fire resistant—makes an exceedingly attractive Mantel.
